The United Nations (U.N) officially came into existence on 24.10.1945. The purpose of the United Nations is to bring all nations of the world together to work for peace and development, based on the principles of justice, human dignity and the well being of all people.

The united Nations sprang from the need to have a post war organization to ensure world peace. Hence, intense pressure was mounted on Britain, China the U.S.A and the USSR to consider initiating a world organization as Second World War raged. Consequently a meeting was convened in Washington D.C in 1944, comprising representatives from the four nations. Towards the end of war, representatives from fifty countries met in San Francisco and hammered out a final text that would lay down foundations for international cooperation . The main goal of the new world organization was to maintain peace and promote social and economic progress.

In its role to prevent war and resolve conflicts peacefully, the UN formed a security council consisting of the five victors of war as the permanent members and representative of ten other countries serving two –year terms. The five countries – China, USSR, the United Kingdom, France and the USA were given veto power. The means that decision made by the U.N can be blocked by any of the principal UN organ for ensuring peace and secondly, because it is the only U.N body whose decision are binding to all member states.

The primary responsibility of the security council is to maintain international peace and security; and in so doing act on behalf of all the member states. In discharging its duties, the security council works in accordance with the purposes and principles of the UN as stipulated in the charter. It submits annual, and if need be special reports to the General Assembly for its considerations.

The UN embarks on conflict prevention and resolution through preventive diplomacy, peace –making, peace- keeping and peace –building. In recent years, however, peace keeping has gained more importance in situations where preventive diplomacy and peace making have failed.
