INSTRUCTIONS TO CANDIDATES

- (a) Write your name and index number in the spaces provided above.
- (b) Sign and write the date of examination in the spaces provided above.
- (c) This paper consists of two sections A and B
- (d) Answer all the questions in section A in the spaces provided
- (e) In section B answer question 6 (compulsory) and either question 7 or 8 in the spaces provided after question 8.

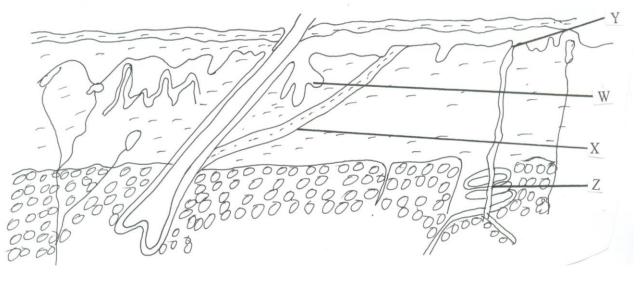

For examiner's use only

Question	Maximum score	Candidate's score
1	8	
2	8	
3	8	
4	8	
5	8	
6	20	
	20	
Total score	80	

SECTION A 40 MARKS

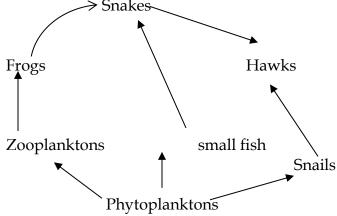

Answer all the questions in this section in the space provided

1. The diagram below shows a section through the mammalian skin

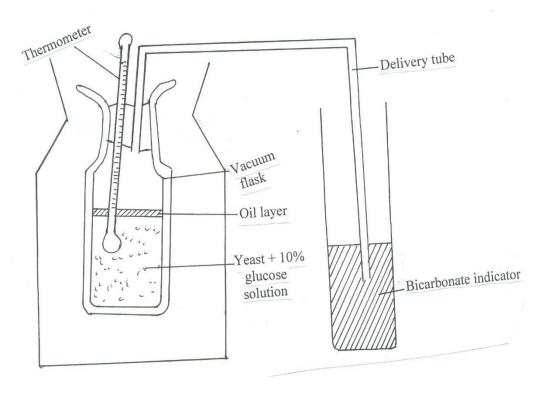

(a) Name the parts labelled W and X	(2mks)
W	
X	
(b) State the function of the parts labelled Y and Z	(2mks)
(c) Explain the changes that occur in the skin when it is cold	(4mks)
	•••••
	•••••
	•••••

2.	(a) Eye colour in fruits flies is sex-linked. Red eye colour R is dominant to white of A heterozygous red –eyed female fly was crossed with a white eyed male	eye colour r
	(i) Show the parental genotypes	(1mk)
		•••••
	(ii) By means of a genetic cross, determine the genotypic ratio of the offsprings	(4mks)
	(**\F 1 : 1 d	((1
	(iii) Explain why the actual phenotype ratio obtained from this cross could differ Expected	(1mk)
		,
	(b) Name two disorders due to non-disjuction	(2mks)
		•••••
3.	The diagram below represents a feeding relationship in an ecosystem.	

(a) Name the type of ecosystem represented by the above food web	(1mk)
(b) Name the organism in the food web that (i) Is a producer	(1mk)
(ii) Occupies the highest tropic level.	(1mk)
(c) (i) Write a food chain that ends with the hawk as a quarternary consumer.	(1mk)
(ii) State two short terms effects on the above ecosystem if all the small fish wer	re killed (2mks)
(d) (i) How does oil spills lead to death of fish?	(1mk)
(ii) Name one other cause of water pollution apart from oil spills.	(1mk)
The experiment below was set – up to investigate some physiological processes. T solution was first boiled then cooled. The set up was left for 24 hours	The glucose

4.

(a) Suggest two aims of the experiment.	(2mks)
(b) (i) State the expected observations after 24 hours	(2mks)
(ii) Explain your observations in a (i) above	(2mks)
(iii) Why was glucose solution boiled then cooled?	(1mk)

	(c) Suggest a control for the above experiment.	(1mk
	A group of students set up an experiment to investigate a certain physiological process. et up was as shown in the diagram below.	The
	Unripe pieces of peeled pawpaw	
	concentrated sugar solution	
	water	
	After some time, the students observed that the level of sugar solution had risen a) What physiological process was being investigated.	(1mk
(a 	a) What physiological process was being investigated.	
(a 	a) What physiological process was being investigated.	
(a 	a) What physiological process was being investigated.	(1mk
(a 	a) What physiological process was being investigated.	

(ii) Give a reason for your answer	(2mks)
SECTION B (40 MARKS)	

Answer questions 6 (compulsory) and either questions 7 or 8 in the spaces provided questions

6. During germination and growth of a cereal, the dry weight of endosperm, the embryo and the total dry weight were determined at two day intervals. The results are shown in the table below:

Time after planting	Dry weight of endosperm	Dry weight of embryo	Total dry weight
(days)	(mg)	(mg)	(mg)
0	43	2	45
2	40	2	42
4	33	7	40
6	20	17	37
8	10	25	35
10	6	33	39

i.	Decrease in dry weight of endosperm from 0 to 10	(2mks)
ii.	Increase in dry weight of embryo from day 0 to day 10	(2mks)
iii.	Decrease in total dry weight from day 0 to day 8	(1mk)
	iv. Increase in total dry weight after day 8	(1mk)
d)	State two factors within the seed and two outside the seed that cause dormancy	
i.	Within the seed.	(2mks)
ii.	Outside the seed	(2marks)
e)	Give two characteristics of meristematic cells	(2mks)

			•••••
7.		rescribe the process of fertilization in flowering plants	(15mks)
	(b) S	tate the changes that take place in a flower after fertilization	(5mks)
8.	(a)	Describe the mechanism of inhalation in man.	(10mks)
	(b)	Using photosynthesis theory explain the mechanics of opening of stomata	. (10mks)
