#### **COMPREHENSION**

##### Taking responsibility

The class teacher was very angry when he entered the classroom. The classroom was very untidy. Desks were not well arranged. There were many pieces of paper on the floor. He wondered why no one had noticed that the classroom needed to be cleaned. "How can you all sit in such a dirty room?" he asked.

Surprisingly, everyone kept quiet. They clearly understood why the teacher was angry. From that day, they decided to come up with a duty rota. Some were assigned the duty of sweeping, others arranging desks and others to ensure the wall charts and pictures were neat at all times. Nobody was left out. As a result, everything was neat in class. Nothing went wrong at all. The teacher was happy with everybody. He praised all the learners for their sense of responsibility.
